I am particularly interested in the Sociology and Psychology aspects My key teaching strengths have been identified as my teacher presence, the ability to build strong relationships with students and the ability to reflect on the effectiveness of lessons and teaching ideas to adapt future practice

My personal skills and qualities:

I have worked in a variety of schools across primary and secondary age ranges. I have experience of working in alternative provision with students who have SEND and behavioural issues which has significantly developed my behaviour management skills and knowledge of adaptive practice. Whilst experiencing different sectors and different types of students I have developed a range of skills including how to build positive relationships with students which allow them to foster a love for learning. This year, I have experienced teaching during the global pandemic. This has allowed me to further develop my skill set and adapt my practice to align with COVID-19 regulations and to better understand students' feelings in this situation and the role that PE and sport can play in supporting mental health and well-being in schools. I am a very reflective practitioner and am constantly seeking ways to develop my practice through responding to feedback, observing experienced practitioners and attending CPD sessions.

My other interests and hobbies:

Since being in school I have always had a passion for PE and sport. I spend most of my free time participating in outdoor activities such as climbing, canoeing and going to the gym. Aside from sport, my other main passion is music. I am the lead guitarist in a band of four and find playing and creating music a great way to develop my mind and creative thoughts. Overall I consider myself to be a very thoughtful and open minded person who can look at situations not just from my perspective but one of others around me.
